Subject: Re: Review of Round 2 sampling

Thanks Janine and Terry. Good work once again, today.

Just adding for Dana T.'s benefit that a few minutes ago we did receive the draft fact sheet on barium for review and comments.

Subject: Review of Round 2 sampling

Dana and Tito,

Terry and I reviewed the second set of well data from Dimock.

Terry had some minor questions re. laboratory analytics that were relayed to and discussed with the OSC for the site. R3 will follow up with their lab.

I noted a few samples with levels of sodium, lithium and methane above their respective trigger levels. In addition, there was one sample with Lead, another with Barium and another with Arsenic slightly above their respective MCLs.

I also reviewed and commented on a fact sheet drafted by ATSDR and the OSC on the potential health effects of excess sodium. We are awaiting a similar fact sheet with regards to Barium.

Please let me know if you have any questions.

Janine
